

Annuals

In-stock availability and varieties may vary.

TOP PICKS -- Shade Tolerant (4 hrs or less)

Some areas in a garden receive almost no sunshine. These areas are considered to be fully or deeply shaded, and there is a limited number of plants that will thrive in them. If you plant flowers that require a lot of sun in a fully shaded spot, you'll be disappointed in the lack of blooms.

Begonia, Wax

Begonia, Non-Stop

Begonia, Dragon Wing

Impatiens

Double Impatiens

Fuschia

Oxalis

Browallia

Coleus

Torenia

TOP PICKS -- Part Sun-Part Shade (4+ hrs of sun)

Many yards and gardens have partial shade conditions due to obstacles that limit the amount of sun available to flowers and other plants. Trees can create filtered light, where some sunlight comes through, but not enough for plants that require full sun.

Petunia

Can handle full sun

Snapdragons

Can handle full sun

Cosmos

Can handle full sun

Dahlberg Daisy

Can handle full sun

Dianthus

Can handle full sun

Geranium

Can handle full sun

Bacopa

Nemisia

Lobelia

Pansies & Violas

Annuals (continued) In-stock availability and varieties may vary.

TOP PICKS – Full Sun (6+ hrs of sun)

If you have a sunny garden, you'll be able to choose from a huge selection of annuals, in all colors, shapes, and sizes. Before planting, you'll want to watch the different areas in your yard to see how much sun they get, especially when surrounding trees and shrubs are in full foliage and may be casting more shade.

Calibrachoa

Dahlia

Verbena

Osteospermum

Portulaca

Iceland Poppy

Rudbeckia hirta
